Reid Joins USDA to Announce Funding for Boulder City Hospital

WHO: Special Guest Senate Majority Leader Harry Reid, USDA Rural Development State Director Sarah Adler, and Boulder City Hospital Chief Executive Officer Tom Maher

WHAT: Senator Reid and funding partners will celebrate “Signing the Blueprint for Health Care in Boulder City” to sign off on the blue print for the expansion and renovation of the Boulder City Hospital and to celebrate the funding partnership that has coalesced to fund this critically important regional health care facility.

Thanks to a collaborative funding effort, the non-profit Boulder City Hospital will be renovated and remodeled extensively to provide a state of the art surgical center, expanded emergency department, and enhanced services for physical and occupational therapy. The expansion of this critical access hospital, which provides emergency care for the region, will also result in 20 additional beds, including a new geriatric psychiatric care unit.

Construction is scheduled to begin this spring, with completion in 2014. The hospital will remain open during the renovation. An estimated 170 jobs will be retained and 90 jobs will be a created as a result of the project.

Background: Boulder City Hospital was originally developed as a federally funded health care facility to provide emergency care for workers at the Hoover Dam.

WHEN: March 27, 2013, 10:30 a.m.-12:00 p.m.

WHERE: Boulder City Hospital, 901 Adams Blvd., Boulder City, Nevada

Note: Hospital tours and media access available just after blue print signing.
